

Regular Wednesday IMG seminar

Mgr. Dalibor Blažek, Ph.D.

CEITEC, Masaryk University

“Identification of a new pathway regulating gene expression”

Cyclin-dependent kinase 11 (Cdk11) is little studied, but essential kinase in human cells. Our recent research has identified its role in regulation of transcription of replication-dependent histone genes and in pre-mRNA splicing. The results will be presented and roles of the kinase in regulation of gene expression discussed.

The seminar will be held

on Wednesday 2nd November 2022 at 15:00

in the Milan Hašek Auditorium at IMG

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
