

## Regular Wednesday IMG seminar

**Šárka Janušová, M.Sc.**

**Laboratory of Adaptive Immunity**

**“ABIN1 regulates T-cell function”**

ABIN1 is a negative regulator of multiple innate signaling pathways. We have identified it as a protein involved in the signaling of T-cell costimulatory receptors. Moreover, it has been recently described as a regulator of T-cell antigenic signaling. Using ABIN1-deficient mouse model, we characterized the role of ABIN1 in T-cell development, homeostasis, and activation.

**The seminar will be held**

**on Wednesday 12<sup>th</sup> October 2022 at 15:00**

**in the Milan Hašek Auditorium at IMG**

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
