

Regular Wednesday IMG seminar

Ana Miladinović, M.Sc.

Laboratory of Biology of the Cell Nucleus

“Phosphoinositides as constituents of diverse nuclear processes: from rDNA damage repair to mRNA processing”

Our primary goal is to understand the function and possible roles of phosphoinositides. The topic of this talk will concentrate on RNA-dependent interactions of PI(4,5)P₂ with proteins involved in rDNA damage and transcriptional factors, as well as the potential function of PI(3,4)P₂ in the final stages of mRNA processing.

The seminar will be held

on Wednesday 1st November 2023 at 15:00

in the Milan Hašek Auditorium at IMG

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
