
Regular Wednesday IMG seminar

Darina Paprčková, M.Sc.

Laboratory of Adaptive Immunity

**“Decoding Immune Memory:
Insights from Naive and Memory T Cells”**

We aim to understand the mechanisms underlying the functions of CD8+ T-cell memory. For this reason, we study the immune responses of activated naive and memory CD8+ T cells. Our data suggest that responses of naive and memory T cells differ in their type of response and differential formation of new long-term memory T cells.

The seminar will be held

on Wednesday 25th October 2023 at 15:00

in the Milan Hašek Auditorium at IMG

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
