

Regular Wednesday IMG seminar

Maria Kuzmina, M.Sc.

Laboratory of Haematooncology

**“HSCs in inflammation: go extramedullary
or go home”**

Hematopoietic stem cells (HSCs) are a rare cell type residing in the bone marrow and giving rise to all hematopoietic cells. Despite their quiescence, HSCs respond to extracellular signals which regulate their fate. In this presentation, we will determine how chronic inflammation affects HSC location and function.

The seminar will be held

on Wednesday 31st January 2024 at 15:00

in the Milan Hašek Auditorium at IMG

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
