

## Extraordinary IMG seminar

**Hanna-Mari Baldauf**

**Max Von Pettenkofer Institute and Gene Center, National Reference  
Center for Retroviruses, Faculty of Medicine, Munich**

**“From virus-host interactions to a novel  
protein delivery tool”**

The VIIRAL lab has advanced the understanding of species-specific virus-host interactions against retroviruses. This advancement facilitates now the development of a rabbit model against HIV, which is a long standing interest in the lab. We use virological, cellular, biochemical, and evolutionary approaches to decipher motifs/pathways that might be important for virus-host interactions. Furthermore, we have developed VICTORI, a novel protein delivery platform that can be tailored for the delivery of therapeutic proteins for different purposes.

**The seminar will be held**

**on Tuesday 27 January 2026 at 15:00**

**in the Lecture room 0.195 at IMG**

(Institute of Molecular Genetics of the Czech Academy of Sciences, Vídeňská 1083, Prague 4)
